

Dear Colleague,

I am writing to you in order to announce the launch of [InterSurgeon](https://intersurgeon.org). This is a unique and innovative website which acts as a platform for creating International Collaborative partnerships in the world of Paediatric Neurosurgery. Whether you are an individual or a representative of a clinical or academic Paediatric Neurosurgical organisation we encourage you to [register with InterSurgeon](https://intersurgeon.org) and make offers or requests for International Collaboration.

The first step is to register on the website and once your account has been ratified you will be able to create offers or requests and give us details of your previous collaborations. You will be able to see geographically where your potential partnerships are and we will match your offers or requests with a suitable partner.

We hope that this will be the first step in establishing long term partnerships with the goal of improving Paediatric Neurosurgical care throughout the world.

Best wishes,

William Harkness & Jim Johnston
Co-founders of InterSurgeon
